INNOVATION

bema Sweezy® 450 Dual E QuadLine

ELECTRIC drive

QuadLine by bema

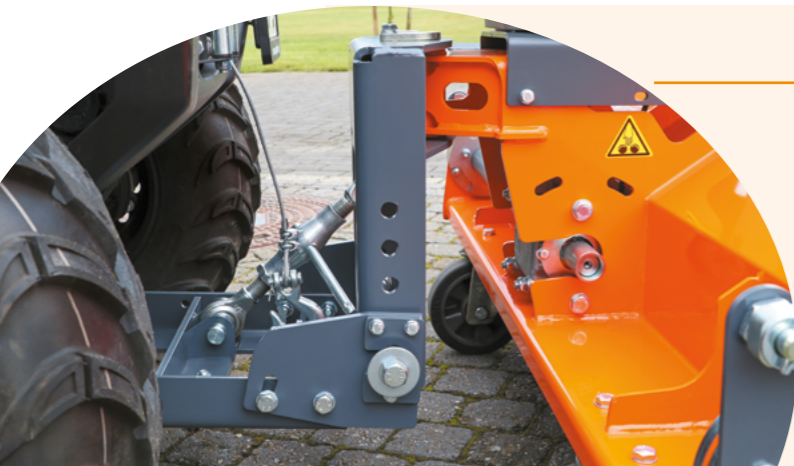

New product line with electric sweeper, push broom and snow plough - optimised for mounting on quads, ATVs and UTVs

In Germany, quads are primarily associated with fun and leisure sports. As robust workhorses, ATVs and UTVs are gaining increasing importance. We have recognized this trend and are expanding our product portfolio with the new **QuadLine**.

Whether sweeping or pushing - the new **QuadLine** attachments are designed to be lightweight and compact, yet still offer the durability you need for work applications. Made from high-quality components and materials, they guarantee a long lifespan and reliable performance – perfect for all the challenges you may encounter!

The new QuadLine attachments will be available through specialized retailers starting in 2025.

Get informed now so you can efficiently use your quad, ATV or UTV next year!

QUICK CHANGE

Standardised mounting console for attaching sweeper, snow plough and push broom

Our innovative special design enables attachments to be changed quickly thanks to a practical three-point hitch. This solution improves efficiency and flexibility in use without compromising on stability and safety. The machine raising is carried out via the rope winch of the quad, ATV or UTV.

GREEN & CLEAN

E-Power - A worthwhile investment in the future:

The bema Sweezy® 450 Dual E QuadLine is a mounted sweeper, which does not require any drive power from your quad, ATV, or UTV. The necessary electrical power is provided by an EGO Power electric motor with one or two powerful 56V ARC Lithium™ batteries (12 Ah, 672 Wh). At a sweeping speed of 4 km/h, an area of approximately 7,300 square meters can be cleaned with a single battery charge. Depending on the battery size and charging technology, continuous operation is possible.

✓ **WORLD'S FIRST INNOVATION - Made in Germany:**

The bema Sweezy® 580 Dual E is the first sweeper with direct electric drive for the main brush and the rotary side brush.

✓ **PLUG & SWEEP - Innovative mounting console**

Simple and convenient. The sweeper is attached to the carrier vehicle in no time and is ready for use immediately.

Other QuadLine attachments:

✓ **PUSH BROOM - bema Multi-Clean QuadLine**

Working width: 1500 mm
Multifunctional use: Pushes silage, snow, sand, grit, fodder & more

✓ **SNOW PLOUGH - bema Snow plough series 550 QuadLine**
